Well, last night was fairly good, conditions-wise back here in the deep south (NC), but the signals were not real strong on me BC-348. I had great fun firin' up ol' Behemothus BCus375us, at about 10-15 watts out

or so. She ran fine from 0130-0430, when the T.O.M. finally threw in the towel (the Java pot was not sufficiently strong to keep de ol' eyeballes open.....(:+\.....). Steve/WA2NHZ was up with his Ranger, Sandy/W5TVW has his PP TPTG fired up, but later dropped the xtal into it for more stability, and Conard/WS4S was up at the end, with his SB-301? Had Paul/K2LMQ on with is CE 200V, and also new feller, Merle/W3GF, with a 40 year old HB barnburner. It was quite interesting. I am thinking that 40 meters will be quite good for the First International Boatanchorite/Glowbuggite Firebottle Rallye this weekend, and 80 should be usable at least out to 1000-1500 miles or so, and maybe more in the wee small hours. 160 may be a bit noisy. But, hope a few of the fine crewe can joine us aboard the watch on the Good Ship Boatanchor, an' haves some fine bottleburning time this weekend.

Will try to get up on band..but one little problem...my "DX 40" has only one rock 7063??? where in the "???" did I get that one? So if I get on the air could someone look for me around there? Yes I will get some more rocks when I get around to it ..seems every time I go to our local ham flea-market I never remember anything..I see all that junk (like we all need more) and I forget what I went there for....I went through my junk box (my garage) and that's the only one I had,so I will be there but won't be on the right freq.
See ya ..73's rich wd6fdd

Here's another lamp chart (from 10th edition of "The Radio Handbook")

TABLE OF TUNGSTEN LAMP RESISTANCE VALUES

Applied Wattage	Lamp wattage rating					
	25	40	50	60	75	100
5	349	195	148	119	90	65
10	412	228	175	139	106	74
15	470	255	194	153	116	81
20	497	273	207	163	124	87
25	529	291	220	172	132	92
30		306	231	181	137	96
35		319	241	189	143	100
40		331	249	197	148	103
45			257	204	153	106
50			265	211	158	110
55				215	162	112
60				220	166	115
65					169	117
70					173	120
75					176	122
80						124
85						126
90						128
95						130
100						132

I need to make room here in the shack. so take your pick, \$4.50 each shipped.
 Regardless of the price it is marked.....
 I WOULD CONSIDER A TRADE FOR ALL

Will try to be there. I have a SWL meeting tonight so may not check in; late if I do. My 40' wire does not do well on 3579 but 40m is no problem.

I should be on with the TR-3 at 200+ watts out, wiggled by a J-36 Lionel.

Boy, lots of VE SSb QRM last night on 7050! All I worked was one QRP'er in MA and I had to explain that I was not on a boat, nor anchored!

Listen for KA1GTT.

73,
--Andy
wallace@mc.com

P. S. For the VFO-abled people, any chance of moving 3579.545 at least once in a while? I am right in the middle of the neighborhood colorburst rallye at all hours on that QRG.

P.P.S. -- I do call CQ BA on the usual QRGs on the quarter hours, so give a listen even if it's not at the top o' the hour.

Most people think FT243 crystals are extinct, and while largely true, CW Crystals still sells them. I don't have their address here but they run little classifieds in QST in almost every issue. I have bought a TON of crystals from them in the last twenty-odd years (and as recently as last year) and their service and goods are first rate.

There was one that really stands out. It was called "There's adventure in Electronics" Actually it was more a kids adventure book about a couple of kids and their adventure in amateur radio. Had a few schematics and actually did a decent job at explaining theory as they went along. Even tho my father was already a ham, that book pushed me more, showing that young folks could enjoy it as well

73

Mike

ps - sure would like to find a copy of it!
